

COMPUTER HOUSING VENTILATION ARRANGEMENT

ABSTRACT OF THE DISCLOSURE

5 A computer housing ventilation arrangement includes a computer case
having an opening in the bottom panel, a wire gauze filter mounted in the opening
of the computer case, and electric fan mounted inside the opening and adapted to
draw outside cooling air upwardly into the inside of the computer case through
the opening to lower the inside temperature of the computer case, and a deck
10 adapted to support the computer case above a flat surface.
